

Nepal–Oita Community *website*

A short guide for everybody who uses the site — visitors, members, the leadership team and the committee. One page per role. Find yours in the table on the next page.

Four kinds of user. What you can do depends on which one you are. Nobody needs to touch code or files.

Anything you change is live at once, unless this guide says somebody has to publish it first.

Setting the site up for the very first time? That is page 8 — it is done once, by whoever runs the site, and never again.

START HERE

Which one are you?

Four roles. Each can do everything the row above it can, plus more.

Audience Anybody visiting. Not signed in.	General member On the register, signed in.	Leadership team Officers and advisers.	Committee The admin account.
---	--	--	--

What each role can do

TASK	AUDIENCE	MEMBER	LEADERSHIP	COMMITTEE
Read events, gallery, stories, programmes	✓	✓	✓	✓
See the register — names, offices, jobs	✓	✓	✓	✓
Send a message from the contact form	✓	✓	✓	✓
See members' phone numbers	—	✓	✓	✓
Read the meeting decisions	—	✓	✓	✓
Edit my own photo, job and social links	—	✓	✓	✓
Send in my own story, and edit it later	—	✓	✓	✓
Add an event	—	—	✓	✓
Add gallery photographs	—	—	✓	✓
Write, edit and delete meeting decisions	—	—	✓	✓
Publish an event or photograph	—	—	—	✓
Approve a story	—	—	—	✓
Add or edit members, hand out codes	—	—	—	✓
Set another member's photo, job and links	—	—	—	✓
Read contact-form messages	—	—	—	✓
Delete things from the site	—	—	minutes only	✓

Two rules worth remembering

- A member's own profile is theirs. The leadership team cannot touch it. The committee can, from the Committee page — that is there for people who have not signed in yet, not for overruling somebody who has.
- Meeting decisions are **members only**. They are not on the open web, and search engines are told to skip that page.

Audience — anybody visiting

No account needed. Everything below is open to everyone.

What you can see

Home	Who we support, what we do, the two homes, events, gallery, stories, our people, how to join, contact. The four numbers at the top are links — press one to jump to that section.
Events	Past and upcoming. Click one for date, time, place, cost and how to register.
Gallery	Eight photographs to start with, then <i>Show all</i> for the rest. Click one to open it large; the side buttons or arrow keys move between them, Esc closes.
Stories	What members say about the community, in their own words.
Programmes	Everything the community runs, and what each one includes.
Members	The register — every name, the office they hold, their profession and any social links. Phone numbers are hidden. Four faces to start with, then <i>See all</i> .

What you can do

- **Send a message.** Home page → *Get in touch*. Name and message are required; email and phone optional. A real person replies.
- **Ask to join.** Same form — choose *Joining* as the subject.
- **Follow us.** Facebook, YouTube and TikTok links are in the *Join us* section, with a QR code you can scan.

Getting around

- On a computer the menu runs across the top. On a phone, tap the three-line button at the top right.
- A *Back* button sits at the bottom left of every page except the home page.
- The arrow at the bottom right returns you to the top.

What you will not see

Members' phone numbers, and the meeting decisions. Those are for people on the register. To get on it, use the contact form and ask.

Signing in, once

Two separate things: an **account** (email and password, which you make yourself) and your **membership** (a one-time code from the committee). You do this once.

First time

- 1 **Get your code from the committee.** Ask at any event, or by message. It is ten letters and numbers, like `K7P4M-2XQRB`, and works once.
- 2 **Go to Sign in** — the red button at the top right of every page.
- 3 **Choose “Make an account”.** Your email address and a password of at least eight characters. Use an address you can get into.
- 4 **You are signed in straight away.** No confirmation email to wait for — the code is what proves who you are, so the address does not need checking.
- 5 **Type the code.** The next box asks for it. This is what links the account to your name on the register.
- 6 **Done.** You will not need the code again.

After that, sign in with the same email and password. Nothing else.

Why a code and not a text message?

It costs nothing and it is stronger. Anyone can type an email address. A code handed to you by somebody who knows your face is what proves you are you.

If something goes wrong

“That email and password do not match”	Check for typing mistakes. If you have never made an account here, choose <i>Make an account</i> — that is the usual cause.
“There is already an account on that address”	You have signed up before. Choose <i>Sign in</i> .
The code is refused	It may already have been used, or it belongs to somebody else. Ask the committee for a new one — issuing one is free and stops the old one working.
Forgotten password	The committee resets it for you, from the Supabase dashboard: <i>Authentication</i> → <i>Users</i> → <i>your address</i> . A new claim code will not help — the code links a card to an account, it does not change a password.
Signed in as the wrong account	There is a <i>Sign out and start again</i> link on the code step.

Signing out

The **Sign out** button is at the top right, beside the menu. It is deliberately not inside the three-line menu, so you never press it by mistake.

General member

Everything the audience sees, plus phone numbers, the meeting decisions, your own profile and your own story.

Your profile — the one thing that is yours

Top right → *Profile*. On a phone: menu → *My profile*.

You can change

Your photograph · your profession · Facebook, Instagram and TikTok links.

You cannot change

Your name · your office in the community · your phone number. Those are the committee's to set — ask them.

- Your photograph is cropped to a square automatically, and **cropped from the bottom, never the top** — so nobody loses the top of their head. If you want space above your hair, leave some in the photo before you upload it.
- Straight off your phone is fine. It is shrunk and re-encoded in your browser before it is uploaded, so a 7 MB photograph goes up as about 45 KB with no visible difference.
- Leave the profession blank if you would rather not say — the card simply shows nothing.
- Social links are public. Only add ones you are happy for anybody to see.

The meeting decisions

Menu → *Decisions*. What the community has agreed, month by month — fees, dates, who is doing what.

- The home page shows the latest one. The two arrows above it step back through earlier meetings.
- The Decisions page has all of them, grouped by month.
- If a write-up is wrong, tell a member of the leadership team — they can fix it.

Send in your story

- 1 Stories page → *Tell us your story*.
- 2 Write a few sentences about your own experience of the community.
- 3 Send it. A committee member reads it and puts it up. Until then only you see it.

You can **edit or delete your own story afterwards** — the words are yours, so a typo does not mean asking somebody else to retype it. What you cannot do is publish it; that stays with the committee.

Phone numbers

Signed in, the register shows each member's number as a button — tap to call. Please do not copy the register anywhere else. Those numbers are shown to members because members are trusted with them.

Leadership team

Everything a general member can do, plus the three things that put content on the site: events, gallery photographs and the meeting decisions.

The one rule to remember

Meeting decisions go live the moment you save them. Events and photographs do not — you add them, and a committee member publishes them.

Meeting decisions — yours completely

Menu → *Decisions*, then the form at the bottom of the page.

Writing one up

- 1 Date of the meeting, and where it was held (optional).
- 2 A title — “August monthly meeting” is fine.
- 3 One line about it, if you want (optional).
- 4 **What was decided** — one decision per line. Press Enter between them. Do not write a paragraph; each line becomes one point on the site.
- 5 Publish the write-up. It is on the site immediately.

Correcting or removing one

- Under every write-up there is *Edit* and *Delete*. Any of the team can use them on any write-up — minutes belong to the meeting, not to whoever typed them.
- *Edit* reopens the same form. Saving replaces the decisions with whatever is in the box, so keep the lines you still want.
- *Delete* asks you to confirm, then removes the write-up and all its decisions. This cannot be undone.

Events and photographs

- 1 Events page → the propose form: date, title, place, details. Gallery page → the add form: file, short caption, category, and the credit and licence if somebody else took it.
- 2 It is saved but not visible yet. Only you can see it.
- 3 A committee member checks it and publishes it.

Why the check: a wrong date for Dashain on the front page has people turning up on the wrong Sunday.

Photographs are shrunk to 1600px and re-encoded in your browser before uploading — a 7 MB camera file becomes about 175 KB. Upload the original; do not shrink it yourself.

What you cannot do

- Publish your own event or photograph, or approve a story.
- Edit or delete anybody’s profile, event or photograph.
- Put a write-up back up after the committee has taken it down.

Committee

The admin account. Everything the site shows is edited from one page — no files, no code.

The Committee page — `/admin`

CARD	WHAT YOU DO THERE
Members	Add or delete somebody. Edit a name, office or number. Set their photograph, profession and links for them. Issue a claim code. Give or remove leadership access.
Events	Add, edit, publish, unpublish or delete — including the ones the leadership team has added.
Stories	Approve, reject or delete what members send in.
Gallery	Upload, caption, publish or delete photographs.
Decisions	Take a write-up off the site, or put it back. Delete one.
Messages	Read what people send from the contact form, and mark it handled.

Adding a new member — the whole job

- 1 *Members* → *Add a member*. The name is the only required field. Office if they hold one, and whether they are leadership or general.
- 2 *Issue a code* on their row. The page shows it once — copy it down.
- 3 Give them the code, with a note to go to *Sign in* → *Make an account*.
- 4 They make an account and type the code. The Members page then shows them as signed in.

There is no database work in this, ever

Two clicks and a code, for member number twenty and for member number two hundred. You never open the SQL editor to add somebody, to link somebody, or to let anybody sign in — the only exception is the one-off setup on the next page. The code is shown once; if it is lost, issue another. That is normal and costs nothing.

- **They have not signed in and never will?** *Add a photo and details* on their row sets their photograph, profession and links for them — most photographs arrive in a message, not through the site. They can change it later.
- **Leadership access.** *Let them add events* allows events, photographs and meeting decisions; *Stop them adding events* takes it back. Separate from which list they appear in on the home page, on purpose.
- **Decisions.** Minutes go up without you, so nothing queues. You keep one lever: *Take down* — the team can still correct it but cannot put it back.

Please be careful with

- **Delete.** No undo, anywhere. Deleting a meeting takes its decisions; deleting a member takes their card.
- **The shared password.** Better to give each committee member their own card and press *Make committee* on it.
- **Phone numbers.** Members only. Never paste them anywhere public.

Setting it up the first time

This page is for whoever runs the site. It is the only part of the whole guide that involves the Supabase dashboard, and it is done **one time** — not per member, and not when anybody signs in.

Do these in order

Step 1 has to come first. Without it, *Issue a code* fails and it looks like the account setup went wrong when it did not.

The four steps

- 1

Run the migration. Supabase dashboard → SQL Editor → paste and run `supabase/migrations/0019_signin_fix_and_admin_profiles.sql`. Until this runs, no code can be issued and no code can be redeemed.
- 2

Make the committee account on the site. Go to *Sign in* → *Make an account*, use `nepaloitacommunity11@gmail.com` and a password you write down. You will be signed in at once. Stop at the code step — you have no code yet, and you will not need one.
- 3

Promote it. SQL Editor → run `supabase/admin_account.sql`. The address is already filled in. It finds that account, links it to the committee card and marks it admin. It cannot create a login, so step 2 has to have happened first.
- 4

Sign in again. The *Committee* pages are now there. From here on, everything is buttons.

Then hand out the codes

Members → *Issue a code* on each person who is not yet linked, and give it to them. That is the button described on the previous page, and it is all that is left.

What this page is *not*

Not per member	Adding, linking and signing in a member involves no SQL at all. Ever.
Not per sign-in	Nobody touches the database when a member logs in. The site does it.
Not repeatable work	Once step 3 has run, the SQL editor is closed for good — until there is a new migration file to apply.

If a new migration file ever arrives

Run it the same way as step 1: SQL Editor, paste the whole file, run it once. Migrations are numbered and run in order. `supabase/setup.sql` is all of them joined together, for setting up a database from nothing.

Quick reference

Where things are

I WANT TO ...	GO TO	WHO
Change my photo or job	/me — top right, Profile	Members
Read what was decided	/decisions	Members
Send in a story, or fix mine	/stories	Members
Write up a meeting	/decisions — form at the bottom	Leadership
Fix a meeting write-up	/decisions — Edit under it	Leadership
Add an event	/events — propose form	Leadership
Add a photograph	/gallery — add form	Leadership
Publish or approve anything	/admin	Committee
Add a member or issue a code	/admin/members	Committee
Set somebody else's photo or job	/admin/members — Add a photo and details	Committee
Read contact-form messages	/admin/messages	Committee
Message the committee	Home page → Get in touch	Anybody

What is live at once, and what waits

THING	ADDED BY	ON THE SITE...
Meeting decisions	Leadership	immediately
Profile photo, job, social links	The member	immediately
Event	Leadership	after the committee publishes it
Gallery photograph	Leadership	after the committee publishes it
Story	Any member	after the committee approves it
Anything at all	Committee	immediately

Common questions, and who to ask, are on the last page.

If something is not right

Common questions

I added something and cannot see it	Events, photographs and stories wait to be published. Signed in, you see your own, marked as waiting.
My name or office is wrong	Only the committee can change those. Ask them.
Decisions says "Members only"	You are not signed in, or your account is not linked to the register yet. You need a claim code.
"function digest ... does not exist"	Migration 0019 has not been run. See page 8, step 1.
I deleted something by mistake	There is no undo. It has to be typed in again.
A photograph looks cut off	Every picture is cropped square to fit its box, from the bottom — nothing is taken off the top. If a face fills the whole frame there is nothing to spare, so leave a little room above the head before uploading.
I forgot my password	The committee resets it in the Supabase dashboard. A new claim code will not do it.

Who to ask

nepaloitacommunity11@gmail.com · the contact form on the home page · or any member of the leadership team at an event.
